ABOUT ARNOTT

OVER THREE DECADES OF AIR SUSPENSION EXCELLENCE

As the trusted leader in aftermarket air suspension parts and accessories for luxury cars, trucks and SUV's, Arnott has grown into a global brand with over 450 SKU's for more than 800 applications that are sold by leading distributors world-wide.

Founded by the Arnott family in Punta Gorda, Florida, Arnott has always focused on ensuring customer satisfaction by manufacturing high-quality, aftermarket products that offer OE form, fit and function at an affordable price.

For more than three decades, Arnott has demonstrated a commitment to developing exceptional air suspension technology and earning the trust of distributors, installers and end users. Arnott's long list of innovations and patents has cemented our position as a global leader in aftermarket air suspension replacement solutions.

BROADEST COVERAGE OF QUALITY AIR SUSPENSION PRODUCTS & OPTIONS

Arnott offers more than 450 quality aftermarket air suspension products covering over 800 applications including remanufactured OE air struts, Arnott-designed new air struts, magnetic shocks, innovative air springs, OES air suspension compressors, coil spring conversion kits, valve blocks and ride height sensors.

WARRANTY

Arnott's Warranty is the gold standard in the automotive aftermarket industry.

For our customers in the United States and Canada, Arnott offers a Limited Lifetime Warranty on all Arnott-branded air springs, new and remanufactured air strut and shock assemblies, coil spring conversion kits and air suspension compressors. Orders from outside the United States and Canada are backed by a Limited Two-Year Warranty.

Arnott's Warranty is non-transferable. Defective parts will be either replaced or repaired if the part is within the warranty period and proof of purchase is provided. Arnott offers a 30-Day Warranty for parts used in commercial vehicles. Improper use or installation is not a manufacturer's defect. Arnott does not warranty air suspension compressors that have burned out due to an air suspension leak, pumps and electrical plugs that were modified, those that have missing labels or that have water damage.

DOING BUSINESS WITH ARNOTT

Our global team works every day to build on the trust and quality the Arnott name has signified to our customers for 30 years. We forge meaningful relationships with every customer and strive to support their continued success. By offering a comprehensive product line at an exceptional value backed by best-in-class support and a trusted global distribution network, Arnott gives its distributors, resellers and installers the necessary tools to maximize their growth opportunities.

THE ARNOTT ADVANTAGE

Since 1989, Arnott Air Suspension has been the trusted industry leader in aftermarket air suspension parts and accessories for luxury cars, trucks and SUVs.

Arnott delivers exceptional innovation to the global aftermarket industry. Our state-of-the-art manufacturing and remanufacturing processes are driven by decades of extensive research and development, now housed in a 60,000-square-foot R&D facility. With a trusted global network of premier auto parts distributors, Arnott products have unparalleled availability in the marketplace. Our leadership in the industry is the result of unwavering dedication to:

- High quality aftermarket products that offer OE form, fit and function at an affordable price
- Professional, multi-lingual US-based customer service
- Demonstrated engineering, manufacturing & management expertise
- Superior Limited Lifetime Warranties

WHY CHOOSE ARNOTT

INFORMATION WITHIN REACH:

Get the specs you need instantly with detailed product information on our website. Arnott products can also be found in standardized industry data feeds via ACES (Aftermarket Catalog Exchange Standard) and PIES (Product Information Exchange Standard). Need a custom ordering solution? Our catalog team can provide customized spreadsheets or feeds.

RELIABLE DISTRIBUTION:

Having multiple Arnott warehouses and partnerships with the industry's foremost distributors, we provide total coverage of North America. This extensive network means fast and dependable deliveries, centralized billing and discounted, tiered pricing.

SEAMLESS INSTALLATION:

We provide the know-how needed to remove faulty OE products and quickly install Arnott replacement products. Arnott's expert Technical Support is complemented by detailed installation manuals and professional installation videos, making installation easy for technicians of all skill levels.

AIR SUSPENSION BASICS

Air suspension systems use a compressor to inflate rubber air springs which may be separate from the shock absorber or combined with the damper as an air suspension strut. Height sensors give the ECU (Electronic Control Unit) a signal when the vehicle is not at a predetermined height and the compressor then pumps air into the air springs until the proper height is reached.

Like all rubber components, air springs and struts are wear and tear parts. Typically, the rubber will dry rot and small cracks form where the air bladder rolls upon itself. On average, an air suspension part will need to be replaced in six to ten years. Mileage, climate, driving conditions and off-road usage also influence the replacement rate.

THE ARNOTT ADVANTAGE

- ▲ Trusted for more than 30 years
- ▲ Premium components
- ▲ OE fit
- ▲ Broadest aftermarket coverage
- ▲ Simplified diagnosis & installation
- ▲ Additional sales & profit
- ▲ Superior support

Arnott's remanufactured OE struts maintain original equipment functionality including factory damping and ride as well as auto-leveling. After the strut is inspected, steam cleaned, and media blasted to bare metal, many of Arnott's remanufactured products are recharged with high-performance shock oil. Worn components, such as the piston, rod guides and seal pack are replaced before being repainted with corrosion inhibiting paint.

Air springs in a vehicle's suspension are durable rubber sleeves that are inflated and deflated through electronic inputs to create a smooth, controlled ride. An air spring can be connected to a vehicle's axle or integrated onto the suspension strut.

TECH TIP: LEAKS

Most air suspension problems occur because one or more of a vehicle's air springs have deteriorated and developed leaks. Thin rubber air sleeves and seals combined with weak crimping rings are common problems in many low-quality knock-offs and some stock air springs.

An air suspension leak is easy to find by spraying the air springs, struts and fittings with a soap and water solution. Bubbles will indicate where the leak or leaks are.

Arnott air springs feature multi-ply sleeves manufactured by industry-leading companies and are engineered to address the common problems many springs develop.

THE ARNOTT ADVANTAGE

- ▲ Long-lasting, premium-brand, multi-ply air sleeve manufactured by industry-leading companies
- ▲ Improved design installs up to 94% faster than OE
- ▲ Quick, economical repair option

ARNOTT OFFERS AIR SPRINGS FOR:

Audi • BMW • Buick • Cadillac • Chevrolet • Citroën • Ford • GMC • Hummer • Iveco • Jeep • Land Rover • Lexus • Lincoln • Mercedes-Benz • Mercury • Oldsmobile • Porsche • Ram • Saab • Toyota • Volkswagen • Volvo

Arnott's engineers apply more than 30 years of remanufacturing experience and knowledge to every new strut they design and continually improve their ability to design new air struts that replicate the OE-like ride drivers expect.

Weaknesses in the OE design are improved and Arnott's new struts are built with Tier 1 components, including longer-lasting seals, new polyurethane bump stops, heavy-duty crimping rings and name-brand, dust baffles.

THE ARNOTT ADVANTAGE

- ▲ Precision-tuned, Eibach monotube damper in many applications
- ▲ Premium brand air sleeves, bump stop & dust boot
- ▲ Works with vehicle's auto-leveling functionality
- ▲ Improved seals to prevent leaks
- ▲ Designed, assembled & tested in the USA

ARNOTT OFFERS NEW AIR STRUTS FOR:

Audi • Bentley • BMW • Buick • Cadillac • Chevrolet • Ford • GMC • Infiniti • Jaguar • Jeep • Land Rover • Lexus
Lincoln • Mercedes-Benz • Nissan • Oldsmobile • Pontiac • Porsche • Ram • Tesla • Volkswagen • Volvo

ARNOTT NEW SHOCK

- Rear shock for 10-12 Land Rover Range Rover (w/VDS)
- New custom-tuned twin tube shock
- Protective dust boot
- New - not remanufactured, eliminates core handling
- Designed, assembled & tested in the USA
- SK-3382

TECH TIP: SOFTWARE UPDATES

Arnott compressors for Land Rover LR3, LR4 and Range Rover Sport may need a software update after installation. Since Land Rover moved away from Hitachi to another compressor supplier, the software update is mandatory. Without this update, the compressor may not function well and this could void the warranty.

Arnott's multi-step remanufacturing process not only ensures that the remanufactured strut is made to our exacting standards, but includes multiple quality checks along the way.

1. Each strut is inspected, disassembled, steam cleaned and spin blasted to bare metal. Our proprietary process replaces old, used oil with new high-performance shock oil.
2. The worn internal components are replaced and the recharged shock is sealed with a new CNC-machined aluminum top.
3. Each shock is computer Dyno-tested to ensure OE durability and performance.
4. Arnott adds a protective, professional finish with corrosion-inhibiting paint and Arnott's skilled assemblers rebuild each strut by hand.
5. New, longer-lasting seals, a multi-ply name-brand air sleeve, heavy-duty crimping rings and other Tier 1 components round out the remanufacturing process.

Only the best are delivered to our customers.

THE ARNOTT ADVANTAGE

- ▲ Works with vehicle's auto damping & leveling system
- ▲ Exact fit & functionality of OE
- ▲ Arnott-engineered to improve strut longevity
- ▲ Plug & play installation is identical to OE

ARNOTT OFFERS REMANUFACTURED AIR STRUTS FOR:

Audi • Bentley • BMW • Cadillac • Chevrolet • GMC • Land Rover • Maybach • Mercedes-Benz
Porsche • Volkswagen

Arnott's Quality Assurance Team is part of the process from development to production. At every step, they make sure that Arnott's high standards of quality, engineering and manufacturing are maintained.

Comprehensive Quality Assurance

World-Class R&D

Arnott's engineers study countless of cores and then strive to improve upon OE product failure points. From shock testing machines to 3D printers to real world testing on company owned vehicles, Arnott is able to provide advanced solutions for today's air suspension replacement needs.

Quality Checked

Arnott computer-tests remanufactured shocks and struts as well as compressors for durability and OE functionality.

Air suspension compressors inflate or deflate air spring bags to maintain a vehicle's factory designated height. Compressor burnout is one of the most frequent air suspension system problems and is often due to overuse caused by leaking air springs or air struts. When the vehicle is not at the correct height due to leaks in the system, the compressor repeatedly cycles to maintain pressure - ultimately leading to its failure.

Arnott's compressors are direct OE replacements and are vigorously tested to ensure a long life and reduced failure rates.

THE ARNOTT ADVANTAGE

- ▲ Meets OE specifications
- ▲ Electrocoated epoxy finish to prevent corrosion
- ▲ Maintenance-free integrated air dryers
- ▲ Most Arnott compressors are fully assembled, including application-specific air lines, wiring harness & brackets
- ▲ Assembled & tested in the USA
- ▲ Includes thermal overload protection
- ▲ Fast, flawless plug & play installation

ARNOTT OFFERS AIR SUSPENSION COMPRESSORS FOR:

Audi • Bentley • BMW • Buick • Cadillac • Chevrolet • Citroën • Ford • GMC • Infiniti • Jaguar • Jeep
 Lamborghini • Land Rover • Lexus • Lincoln • Maybach • Mercedes-Benz • Mercury • Nissan • Oldsmobile
 Peugeot • Porsche • Ram • Tesla • Toyota • Volkswagen • Volvo

**Precision
Production**

Our precise production processes ensure the highest quality products are built every time, and that our discerning customers only receive the best parts for their vehicles. With facilities in North America and Europe, Arnott has over 300,000 square feet of manufacturing floor space which includes multiple 5-Axis CNC machines, advanced recharging stations, automated painting, and state of the art warehousing.

Arnott's commitment to OE quality form, fit and function begins with exhaustive engineering. Arnott's advanced designs are not only more durable, but many are also easier to install than their OE counterparts.

Innovative Engineering

ENGINEERED TO RIDE, BUILT TO LAST.

ARNOTT-DESIGNED NEW AIR STRUTS

- Custom-valved shock adapts to driving style
- Premium brand air sleeve, bump stop & dust boot
- Works with vehicle's auto leveling functionality
- CNC-machined aluminum or stamped steel top
- Improved seals to prevent leaks
- Many connect to ADS system to eliminate warning lights
- Engineered & assembled in the USA
- Limited Lifetime Warranty on Arnott-branded products

REMANUFACTURED AIR STRUTS

- Tested, cleaned & recharged OE shock
- New sealing cap & air line fitting
- Works with vehicle's auto damping & leveling system
- Premium air sleeve, bump stop, air fitting & dust boot
- OE top mount & sensor
- Remanufactured in the USA
- Limited Lifetime Warranty on Arnott-branded products

MAGNETIC RIDE SHOCKS

Magnetic Ride Shocks are now offered in Arnott's aftermarket suspension product line. Designed as a direct replacement for GM SUVs with the magnetorheological damper system Z95 RPO, Arnott's OES magnetic shocks provide the same adaptive ride as the OE.

What are Magnetic Ride Shocks?

Magnetic Ride Shocks consist of a monotube damper filled with a combination of synthetic hydrocarbon oil and readily magnetized iron particles (the sum of which is known as magnetorheological fluid) as well as electromagnetic coils. Maintaining the system are a sensor set and an Electronic Control Unit (ECU).

How do Magnetic Ride Shocks work?

If the vehicle sensors detect a change in road conditions, a signal is sent to the ECU. The ECU then determines the electromagnetic current strength required for each shock. When activated, the electromagnetic coils create a magnetic field that instantly magnetizes the iron particles, increasing the viscosity of the magnetorheological fluid and suspension stiffness.

AIR SPRINGS

- Premium name-brand air sleeve
- Faster, easier installation
- Engineered & assembled in the USA
- Compatible with OE struts, air line & leveling system
- High-impact polyurethane or aircraft-quality aluminum

AIR SUSPENSION COMPRESSORS

- Compressors meet OE specifications
- Includes thermal overload protection
- Electrocoated epoxy finish to prevent corrosion
- Extensive life-cycle testing
- Most mate with OE lines & plugs for ease of installation
- Limited Lifetime Warranty on Arnott-branded products

COIL SPRING CONVERSION KITS

- Patented Electronic Bypass Module (EBM) eliminates fault codes
- Custom-valved shock absorbers
- Durable American-made, powder-coated coil springs
- Pre-assembled for easy & safe installation
- OE fit with no modifications needed

SOLENOID VALVE BLOCKS

- Distributes air pressure within the air suspension system
- Direct OE replacement
- Designed to meet or exceed OE
- Helps restore original air suspension system
- Growing product category

RIDE HEIGHT SENSORS

- Determines vehicle height
- Tested to 1 million cycles
- Road tested for function & fitment
- Direct fit for fast, plug & play installation
- Quality components including hardware & mounting points for long service life
